The Invited Book

A chilling ghost story with a twist: the [New York Times](#) bestselling author of [The Winter People](#) returns to the woods of Vermont to tell the story of a husband and wife who don't simply move into a haunted house, they start building one from scratch, without knowing it, until it's too late . . .

The Invited Guest

In a quest for a simpler life, Helen and Nate abandon the comforts of suburbia and their teaching jobs to take up residence on forty-four acres of rural land where they will begin the ultimate, aspirational do-it-yourself project: building the house of their dreams. When they discover that this charming property has a dark and violent past, Helen, a former history teacher, becomes consumed by the legend of Hattie Breckenridge, a woman who lived and died there a century ago. As Helen starts carefully sourcing decorative building materials for her home--wooden beams, mantles, historic bricks--she starts to unearth, and literally conjure, the tragic lives of Hattie's descendants, three generations of "Breckenridge women," each of whom died amidst suspicion, and who seem to still be seeking something precious and elusive in the present day.

In the very beginning of the story, Hattie Breckenridge is hung for being a witch. Nate and Emily decide that they want to build a house in Vermont. The plot of land that they purchase is haunted. They then learn that Hattie use to live on the land that they purchased a century ago near the Bog. Then things get really interesting. Helen doesn't know it but she ends up building a haunted house from sctatch. Then strange things start happening.

Then Olive, a 14 year old girl, tried to find her mother who disappeared without a trace. She lives with her father and they are both grieving. Before her mother died she told her that there was a hidden treasure somewhere in the woods that borders the bog. Olive then is on a search to find the treasure.

A chilling gothic ghost story with a twist which was not scary but very creepy and it did give me goose bumps. It's also a thriller and a mystery.

I was immediately drawn into the story, since I loved the atmosphere and the supernatural eerie world of this book. The book goes back and forth from the past to the present. There are dark secrets that are slowly revealed. The book kept me in suspense to find out what was going to happen next.

I thought this was a character driven novel. They were very well developed. My favorite character was

Olive. I loved the writing style which had short chapters. I found it to be an addicting read.

I recently read The Winter People and loved that book too. I already downloaded The Night Sister, by this author and can't wait to read it. I just want more from this author.

I think you will love this if you like a good ghost story that then changed into a thriller.

This was a Traveling Sister Read and a lot of us enjoyed it a lot. It made a great group read.

Nate and Helen decided to change their lives. They resigned from their teaching jobs and moved to rural Vermont where they began building the home of their dreams. They purchased the forty-four acres of land from a man who was extremely motivated to sell. So happy to have a good deal, in a beautiful setting, they soon learned that their land was once owned by a suspected witch, Hattie Breckenridge. A woman who the town chased down and hung for being a witch. Rumors about the land are all over town. People also had tales about sightings of Hattie. Undeterred, Helen and Nate continue to build their home. When Helen purchases materials for her home, not only do strange things begin to happen but she begins to have sightings. Intrigued by the history of the land and tales of Hattie Breckenridge, Helen decides to learn all she can about Hattie and her descendants.

Olive, a local teenager, is looking for answers about her Mother's disappearance. She is also obsessed with finding lost items in the bog. To right a wrong she agrees to help Helen and Nate build their house. As the trio continue to build Helen and Nate's dream home, it becomes evident that the past is not ready to rest, that items can act as conduits, and that Hattie and her descendants need help.

The Invited begins with a thrilling scene which got my attention right away. When the tension of that scene is over, things slow down as the story in the present day is being told. I found the first half of the book to be on the slower side as McMahon built her story, introduced her characters and set up the book for the second half. Speaking of the second half, things picked up and became interesting as there are more sightings and the back stories of Hattie's descendants are told.

I can't say that this was my favorite McMahon book. (My favorite being *The Winter People*) but this book was atmospheric and the bog was eerie. This book was not spooky, scary or even creepy. So more people may be able to enjoy this book. It won't keep anyone up at night, checking under their beds or looking in their closets, but it was enjoyable. It was also well written, and things came together nicely in the second half of the book. Witches, ghosts, Vermont, bogs, deer, lost items, found items, strange noises and wild life all play a part in this paranormal tale/mystery.

Ultimately, they decide on a large plot of land in rural-Vermont with a rich history. Leaving their cushy CT-lives behind, they move into an old trailer on the new property and commence building their dream home.

Olive, a young girl, and new neighbor to Helen and Nate, is missing her Mom, who left home one night and never returned. Rumor has it that she has run off with a boyfriend but Olive doesn't believe it. Acting out and skipping school, Olive is on a path to nowhere, if someone doesn't step in and help her.

As with *The Winter People*, McMahon has blended perfectly past and present into this story. In addition to the main storyline, described above, we also learn about some characters from the past who have deep connections to Helen and Nate's land. The way that all of these storylines are woven together and ultimately connect is seamless.

McMahon has such a haunting way of writing. There is an overriding sinister ambiance to her stories, that make them an absolute joy to read. She adds just the right amount of chilling atmosphere and occult references to give her stories a genuine feel without being gaudy or overdone.

Some of the plot elements I found were a little too easy to figure out, too simplified, if you will, which is why I decided on a 4.5-star rating as opposed to a full 5-stars. That is totally my opinion however and I can understand why people would give it a higher, or even a lower, rating. For me, this ghost story with a twist was highly entertaining and that is what I am basing my rating on.

"Some people move into a haunted house, but you, you want to build a haunted house, Helen. How fucked up is that?"

McMahon has quickly become an autobuy author for me. I feel like people are definitely going to love this one. Get your hands on it, people! Releasing next month!!!

As Helen fills the house with local artifacts, she stirs some spirits from the past. Suspicious and unfriendly townspeople, strange noises in the night, paranoid thoughts, and a story from a century ago have Nate and Helen desperate to figure it all out.

A ghost story and a haunted house made this one an intriguing story with some tension and foreboding. Well-written with a unique spin that held my attention until the end. I really enjoyed this one.

* I did not find this one scary. There are themes of generational curses, spirits, witches, and ghosts.

are building their house themselves and Helen goes about finding things that are related in some way to Hattie Breckenridge, a rumored witch who lived on that property a century ago. Helen has trouble finding anyone willing to talk about Hattie and in fact, a lot of the local townsfolk seem to be suspicious of Helen and Nate, for buying and living on Hattie's property.

This is not a horror story but it is a ghost story. The scares are subtle and the story is a slow one, building quietly, as we get to know Helen and Nate, in their new surroundings and also get to know a their 14 year old neighbor, Olive and her dad. Olive's mom disappeared the year before and rumors have it that she ran off with a man, much to her husband's utter grief. Olive's aunt Riley watches over Olive and her brother when she can but mostly Olive is on her own, skipping school to look for clues to her mother's disappearance.

Strange things are happening in the tiny town and on Helen and Nate's property, causing friction between the couple as Helen keeps looking into Hattie's haunted past while Nate seems to be on his own supernatural quest, as he tries to follow a white deer through the woods. Then there are some townsfolk who seem to be up to no good, with their seances and secret meetings.

I enjoyed this slow book, especially spunky Olive and her sad father. This was a group read with the Traveling Sisters group on Goodreads and also my Goodreads friend JuJu (Julie). Thank you to Doubleday Books and NetGalley for this ARC. ...more

I love how this author puts her stories together, outwardly happenings mixed with human greed. Although some of this was predictable, other parts weren't, and the ghostly vibes kept me reading. The past is never completely past, not in a person's mind and maybe the spirit world can reach out and attach itself to familiar things. At least this author makes it seem possible. She always gives the reader someone to root for, and in this one it is a you g girl who needs some answers to some very serious questions. At the end one can't help but thinking that the humans are scarier than the ghosts. Or at least their motives less than pure. This was just spooky enough for this reader. ...more

This book is nothing short of astounding.

If you've been following me for a while (or even for a week or two), then you know that I love horror. I love reading every single word and letting it sink in. I love the heart pounding, fear I get when I read scary books. Of course, if you know me in real life, you know that I am a big scaredy cat. I hate dark places, tight spaces and scary situations. So why, would I like horror books? Mostly because I can control the situation. When I'm reading, I know what I'm reading isn't real and that I can always shut the book.

One thing most horror authors (*cough* Stephen King *cough*), is have a very subtle slow build of horror. As a person who has ADHD and a very short attention span, I need my books to be fast paced. And this book kind of was? I mean it would go a few chapters being super exciting and then for a chapter or two it would get a bit boring. At least, it was able to correct the pacing pretty often.

A common horror trope is no one believes the protagonist. I was a bit disappointed that for a while, no one would believe Helen. Another common trope is when partners slowly become distanced and angry at each other. That happened and it was heartbreaking to read.

On the note of boring-ness, I really enjoyed all of Helen's chapters and the sprinkled-in POV of Jane and Ann but I really did not enjoy Olive's chapters. I found them really boring. Maybe it was because Olive just never clicked. I really didn't find myself caring about her or her story.

Something a couple of horror novels have done is discrediting the paranormal activity. For example, the ghost isn't a ghost, it's an animal. I really loved that none of the paranormal activity was ever discredited by Helen. She was a believer to the end.

Finally, I was a big fan of that plot twist. Obviously, I won't spoil it but trust me. You want to read this book if only for that kind boggling twist.

Witchcraft, a wicked creepy town history, things that go bump in the night. Yes please! I loved this book! I didn't know what to expect when I agreed to read this book as a group read with some fellow Traveling Sisters. Whew, let me tell you it was fantastic. I was creeped out right down to my toes. Helen and Nate decided to pursue their dream of building their own little dream house in Vermont in the middle of literally nowhere. Little by little the history of their dream lot started to reveal itself and it was not pretty. Even though it was extremely sad and disturbing I must admit I was drawn in immediately. It was fascinating to hear about the town and it's past. Quite frankly it just kept getting more interesting as the book went on.

Things began to happen that could not be explained away. As Helen starting witnessing things that were obviously supernatural in nature, she seemed even more in love with her dream property. Me, I would have packed my bags and gotten the hell out of there and back to Connecticut immediately!

I guess why I was so in love with this book is that it has such fine details and was so atmospheric. I literally felt chills down my spine and was uneasy as I was reading much of the book. Horror it is not, but it is one great creepy read. The story line was so interesting, I could not get enough of the town's history.

Anyone that knows me well at all knows I absolutely A-D-O-R-E Jennifer McMahon. She writes some of the creepiest and most chilling books I have ever read. Unfortunately, while I still really enjoyed *The Invited*, it was not my absolute favorite from her.

What it's about: Helen and Nate have decided to leave their teaching jobs and move from the suburbs of Connecticut to forty-four acres in Hartsboro, Vermont. Using money she received after her dad died, Helen and Nate decide to build a house on the land and stay there in a trailer while it is being built. But this is not your standard, large piece of land and people in the area say it is haunted. Helen likes things with history though, and Nate doesn't believe in ghosts. Soon Helen finds herself engrossed with the history of the property and the dark things that happened on the land. But when strange things start to happen at the building site during the night, Helen and Nate must decide if staying there is smart, or if it has the potential to be deadly...

The Invited jumps between past occurrences on the land, and POV-wise mostly between Helen and a young girl named Olive in present day. I loved the different timelines and storylines in the book, and they definitely kept me very interested in what was going on. I wasn't a huge fan of all Olive's sections, but most of them were necessary to the story.

And like with most of this author's books, *The Invited* has a very real ghost aspect to it. So if you don't like books that delve into the supernatural world, I wouldn't necessarily recommend this to you. I happen to love that about McMahon's novels, and that ended up being what disappointed me the most in this one. While the ghost aspect was there, I think she could have gone SO much further with it and made this book even better than it was. Especially considering the fact that this cover is so dang creepy and perfect for the story.

Also, did I mention how atmospheric this book is?? The setting was positively eerie, and it made everything seem even creepier.

Final Thought: *The Invited* is quick, interesting, and classic McMahon so if you haven't picked up a book by her yet, or are already a huge fan, I definitely recommend picking this up. I loved that the sections of the book were broken into the building of the house, plus the pacing, along with the other things I mentioned. The only things that fell short for me were the ghost aspect, finding myself annoyed at times with Olive's sections, and the fact I figured out a major part of the plot before it happened. This was still a very solid read though and one that I will be recommending!

The Invited McMahon

I always get excited about a new Jennifer McMahon book. I've mentioned before that I became acquainted with her work quite a long time ago when I devoured a few of her earlier novels, namely PROMISE NOT TO TELL and DON'T BREATHE A WORD.

Still, my favorite McMahon is THE WINTER PEOPLE. She's had a few releases after it, THE NIGHT SISTER and BURNTOWN but I didn't get on so well with either of those.

Unfortunately, I'm afraid I had similar issues with this book too--but let's see if I can unpack this. I always get excited about a new Jennifer McMahon book. I've mentioned before that I became acquainted with her work quite a long time ago when I devoured a few of her earlier novels, namely PROMISE NOT TO TELL and DON'T BREATHE A WORD.

Still, my favorite McMahon is THE WINTER PEOPLE. She's had a few releases after it, THE NIGHT SISTER and BURNTOWN but I didn't get on so well with either of those.

Unfortunately, I'm afraid I had similar issues with this book too--but let's see if I can unpack this in such a way that honors the story and McMahon's writing.

The premise of the book is simple: A married couple leave their Big City lifestyle to buy a plot of land in Vermont and build a house and a sustainable, quiet life there.

Of course, it wouldn't make for a very interesting story if our couple didn't buy some haunted land rich with paranormal activity and a violent history, right? Right.

And the promise for a great ghost story is right at our fingertips--the prologue delivered, sure enough--I was very excited to hear more about our "witches" Hattie & Jane.

Fast forward to our present day storyline:

I really enjoyed getting to know our couple, Helen and Nate as they set to work building their colonial "saltbox" style home on their new property with a haunted bog.

To make things interesting, the readers are also treated to the story of Olive, a young girl living with her parents in the same, small town that our couple from the Big City now reside.

Soon enough, readers will begin to guess at how these two stories will intersect (I did and I have to admit, I was inwardly groaning a little- but optimistic! Maybe my hunch as to where the story was going to go, would be wrong! It wasn't.).

This is where I think it would be appropriate to set up some realistic expectations for this book. Fans of THE WINTER PEOPLE are going to hope this book is like THAT, a ghost story/mystery with teeth. It's not. This is more like a sprawling, a character-driven, gothic tale that takes its time delving into a rural, small town past with loads of secrets.

Which is fun. Readers will love this! Especially Jennifer McMahon fans who show up for her unique brand of atmospheric, engaging storytelling and memorable characters.

For me personally, a die-hard avid horror fiction buff reading this ARC during #womeninhorrormonth, this lacked punch. There was nothing here to get my engine to turn over and start purring. I read this with very baseline feelings of calm, serenity and enough curiosity to keep going--I wasn't bored but I was eager for the reveals and the end.

My recommendation is that the writing is solid, engaging and compelling enough to keep almost any reader interested. Horror fans will be disappointed. That's just the truth of the matter. I liked it fine, I

Helen and Nate have a nice, settled life as teachers at a private school in Connecticut. But they also have aspirations for a simpler life. So using their savings and an inheritance, they buy 40+ acres in the tiny village of Hartsboro, Vermont and decide to build their own dream house themselves. Helen, a history teacher, wants a house and land with history--and she gets her wish when she discovers the story of Hattie Breckenridge, a woman who apparently lived (and died) on their property over a hundred years ago. Marked by the villagers as a witch, Hattie was killed, leaving behind her young daughter, Jane. Helen becomes fascinated with Hattie's past and begins trying to find out what happened to her--and her family members. But a series of more and more weird events start happening once they move in. Is it just the people of Hartsboro, who don't like outsiders? Or is it Hattie? And are Helen and Nate in danger?

I just love Jennifer McMahon's books and she's someone whom I will read anything they write. This was such a good book that drew me from the very beginning. I started it while on vacation in Vermont, so I was really excited that it happened to take place in Vermont--a place I'd never been until this year. McMahon's descriptive language makes it so easy to visualize her (often eerie) settings, as well as her characters.

Along with Helen and Nate, our slightly hippyish couple, we have Olive, a teenage girl from Hartsboro, and her dad and aunt, plus various Hartsboro townfolk. Olive was a very compelling character; she's been abandoned by her mother and is teased and bullied terribly by her schoolmates, since the town all believes her mom ran off with another man. Her bereft father isn't much help, leaving her to raise herself or rely on her aunt. She has one friend, Mike, who is a good guy, but annoys our feisty heroine with his wimpy-ness. It's hard not to fall for Olive, believe me. Even Helen will grow on you, too. And no matter what, they are so easy to picture.

The novel is told from a variety of points of view, but mainly Olive and Helen. We learn a lot about each of them. As I said, it drew me in from the beginning and kept me reading. As with most of McMahon's books, it's layered with that creepy, mysterious edge. In many ways, it's a proper ghost story. But she always manages to write it so that instead of rolling your eyes, you feel a little creeped out, or find yourself looking over your shoulder at night. Hattie herself plays a really strong role in this book, and I liked how well the story set up the idea of how much people (and small towns) fear what they don't know.

"What people don't understand, they destroy."

The Invited

It's funny, I could guess where a lot of this book was leading, yet it in no way diminished my enjoyment of it. I could see how that might annoy some, but it didn't bother me in the least. I was completely immersed in the characters, the eerie ghost story, and trying to piece together all the plot pieces. Hattie's story--and that of her descendants--is fascinating. There was just something about this book that I loved: that intangible piece that makes you a part of the story, keeps you flipping the pages, and makes you feel both sad and amazed when you finish the book. 4.5 stars.

I received a copy of this book from the publisher, Doubleday, and Edelweiss in return for an unbiased review (thank you!).
