A Longitudinal Analysis Of Satisfaction And Profitability

Effects of weight gain and resumption of menses on reduced ... Effects of Weight Gain and Resumption of Menses on Reduced Bone Density in Patients with Anorexia Nervosa Toshiya Iketani, Nobuo Kiriike, Shigehiro Nakanishi, and Tadao Nakasuji The bone mineral density (BMD) of the lumbar vertebrae (L2-L4) and of the whole body were measured in cross-sectional and longitudinal studies in female patients with eating disorders, using dual photon absorptiometry. Coming Out of Retirement Predictors of Driving ... Descriptive analysis of the 2011-2015 National Health and Aging Trends Study data (Round 1: n = 6,680; Round 5: n = 3,409) characterized the extent of driving resumption through 2015 by baseline driving status (driver, former driver, never driver). Weighted multivariate logistic regression and multilevel longitudinal models examined. Prevalence of and risk factors associated with sexual ... Many women are not prepared for changes to their sexual health after childbirth. The aim of this paper is to report on the prevalence of and the potential risk factors (pre-pregnancy dyspareunia, mode of birth, perineal trauma and breastfeeding) for sexual health issues (dyspareunia, lack of vaginal lubrication and a loss of interest in sexual activity) at 6 and 12 months postpartum.

Body fat and menstrual resumption in adult females with ... BACKGROUND: The variables predicting the resumption of menses in anorexia nervosa (AN) after weight restoration have not yet been fully established. We therefore aimed to investigate the association between several clinical parameters at inpatient discharge and the resumption of menses at 1-year follow-up in weight-restored adults with AN. PDF Full Ebook? This is the best area to right of entry a longitudinal analysis ... analysis of the risk of resumption of menses PDF Full Ebook [PDF] download a. Resumption of menses in anorexia nervosa during a course ... The resumption of menses (ROM) is considered an important clinical marker in weight restoration for patients with anorexia nervosa (AN). The purpose of this study was to examine ROM in relation to expected body weight (EBW) and psychosocial markers in adolescents with AN. We conducted a retrospective chart review at The University of Chicago Eating Disorders Program from September 2001 to.
