Alpensteenbok - Wikipedia De alpensteenbok (*Capra ibex*) is een evenhoevig zoogdier uit de familie der holhoornigen (Bovidae), en een van de negen recente soorten uit het geslacht van de geiten (*Capra*). De wetenschappelijke naam van de soort werd in 1758 gepubliceerd door Carl Linnaeus. De alpensteenbok is endemisch in de Alpen van Centraal-Europa. Humans were once an endangered species - Phys.org (PhysOrg.com) -- Scientists from the University of Utah in Salt Lake City in the U.S. have calculated that 1.2 million years ago, at a time when our ancestors were spreading through Africa, Europe. Gazella - Wikipedia, la enciclopedia libre Las gacelas (*Gazella* spp.) son antilopos de tamaño medio, ágiles y de patas largas. El nombre femenino gacela viene de la palabra persa Ghazal, que significa "elegante y rápida". Pueden alcanzar velocidades de 97 km/h, y mantener una velocidad de 56 km/h por un periodo prolongado.

Hirscheber - Wikipedia Die Hirscheber (*Babirusa*), auch Babirusas genannt, sind eine Säugetiergattung aus der Familie der Echten Schweine (Suidae). Sie leben nur auf Sulawesi sowie den vorgelagerten Inseln und sind für ihre langen, den Hals durchbrechenden Hauer bekannt. Während früher alle Tiere zu einer Art zusammengefasst wurden, werden heute vier Arten unterschieden, darunter eine ausgestorbene. Militaria Mart is an online shopping centre and resource ... 10th Century Viking Bearded Battle Axe, Re-Hafted in Viking Form An original hand forged Viking battle axe of around 1100 years old, A bearded axe, or Skeggax [from Old Norse] refers to various axes, used as a tool and weapon, as early as the 6th century AD. Full text of "NEW" - Internet Archive Search the history of over 362 billion web pages on the Internet.

## Handbook Of The Birds Of The World

Tragelaphus strepsiceros - Wikipedia, la enciclopedia libre Descripción. Es el tercer antilope en cuanto a tamaño, solamente superado por las dos especies del género Taurotragus, [2] mide en promedio 2,20 m de longitud y 1,50 m de altura y posee una cola de 45 cm de largo. El peso promedio es de 320 kg en los machos y 220 kg en las hembras. El pelaje es de color gris a castaño grisáceo con 7 a 10 bandas verticales blancas a cada lado. Penis - Wikipedia As with any other bodily attribute, the length and girth of the penis can be highly variable between mammals of different species. In many mammals, the size of a flaccid penis is smaller than its erect size. In the realm of absolute size, the smallest vertebrate penis belongs to the common shrew (5 mm or 0.2 inches). [citation needed]A bone called the baculum or os penis is present in most. Rendier - Wikipedia Het rendier (*Rangifer tarandus*) is een zoogdier uit de familie der hertachtigen (Cervidae). De wetenschappelijke naam van de soort werd als *Cervus tarandus* in 1758 gepubliceerd door Carl Linnaeus. Rendieren komen in het wild voor in de taiga en toendra van Noord-Europa, het noorden van Azië en Noord-Amerika. Het rendier is lang geleden in Eurazië gedomesticeerd en wordt nog altijd gehouden.

Okapi: A giraffe-zebra hybrid? - Mammalian Hybrids The okapi (*Okapia johnstoni*), also known as the forest giraffe or zebra giraffe, is a good example of the way theory affects both perception and research activities. Okapis mix traits otherwise seen only separately either in the giraffe or in the zebra, and under ordinary circumstances this fact would constitute strong evidence that okapis are giraffe-zebra hybrids. Baleine bleue - Wikipedia La baleine bleue (*Balaenoptera musculus*), appelée aussi rorqual bleu, est une espèce de cétacés de la famille des Balaenopteridae. Pouvant dépasser 30 mètres de longueur et 170 tonnes, c'est le plus gros animal vivant à notre époque et, dans l'état actuel des connaissances, le plus gros (avant deux grands sauropodes dont le saurosaure) ayant vécu sur Terre. Giant forest hog - Wikipedia Characteristics. The giant forest hog is, on average, the largest living species of suid. Adults can measure from 1.3 to 2.1 m (4 ft 3 in to 6 ft 11 in) in head-and-body length, with an additional tail length of 25 to 45 cm (9.8 to 17.7 in).

## Handbook Of Theory And Research For The Sociology Of Education

*Babyrousa babyrusa* - Wikipedia Il babirusa delle Molucche (*Babyrousa babyrusa* Linnaeus, 1758) Ã¨ una specie di babirusa (genere *Babyrousa*) presente oggi esclusivamente su alcune isole indonesiane: Mangole e Taliabu, del gruppo delle Sula, e Buru. In passato, il suo areale comprendeva anche l'isola di Sulawesi, dove oggi la specie Ã¨ estinta.
