Twitpic Dear Twitpic Community - thank you for all the wonderful photos you have taken over the years. We have now placed Twitpic in an archived state. Ion plating - Wikipedia Ion plating (IP) is a physical vapor deposition (PVD) process that is sometimes called ion assisted deposition (IAD) or ion vapor deposition (IVD) and is a version of vacuum deposition. Ion plating uses concurrent or periodic bombardment of the substrate, and deposits film by atomic-sized energetic particles. Bombardment prior to deposition is used to sputter clean the substrate surface.

Thin and thick film » Resistor Guide Thin and thick film resistors are characterized by a resistive layer on a ceramic base. They might look similar, but their properties are different.

Thin-film interference - Wikipedia Thin-film interference is a natural phenomenon in which light waves reflected by the upper and lower boundaries of a thin film interfere with one another, either enhancing or reducing the reflected light. When the thickness of the film is an odd multiple of one quarter-wavelength of the light on it, the reflected waves from both surfaces interfere to cancel each other. Handbook of Organic Electronics and Photonics - aspbs.com ABOUT THIS HANDBOOK: Handbook of Organic Electronics and Photonics brings together chemists, materials scientists, physicists, and engineers from both academia and industry to share information on the organic materials for emerging new electronic and photonic technologies. The three volume set offers exclusive coverage on all types of organic molecular and polymeric functional materials, their. Growth, dielectric properties, and memory device ... The most popular ZrO₂ thin film deposition method is sputtering from ZrO₂ or Zr targets. Ramanathan et al. reported the fabrication of 5-nm-thick Zr thin films by ultra high vacuum (UHV) sputtering from a Zr metal target on silicon nitride substrates. Oxidation of polycrystalline Zr metal was then performed in situ using ultraviolet (UV), from an Hg vapor lamp, annealing in oxygen ambient.
